2 DAY LECTURE COURSE

This course provides an overview of the methods and procedures used to prepare air quality permits. The course is intended for personnel of State and Local permitting agencies who are relatively new to Permit programs. The course should prove useful for permit writers and for inspectors who must read and interpret conditions and perform inspections of permitted sources.

This course is taught at an introductory level and is intended to be followed by CARB 334 – Permit Writing II

***Day 1 - The components of permits, the review process, and
permit conditions***

***Day 2 - Approaches in writing permits, documentation, and compliance
considerations***
